SUMMARY

Java backend developer with industry experience building enterprise and full-stack applications using Java, Spring Boot, Spring Security, REST APIs, JPA/Hibernate and MySQL. Currently a Founder's Office Intern at Foreman Labs, an industrial-AI startup, building React/Next.js features with a role that extends into Python and AI-agent development. Skilled in secure, layered backend design, JWT authentication with role-based access control and SQL query optimization, with a strong foundation in OOP and DSA.

TECHNICAL SKILLS

Languages	Java, Python, SQL, JavaScript, HTML/CSS, C/C++
Backend	Spring Boot, Spring MVC, Spring Security + JWT, Spring Data JPA, Hibernate, JDBC, REST APIs
AI & Python	LLM API integration (Gemini), AI agents, FastAPI (basics)
Frontend	React, Next.js, Tailwind CSS, Angular, JSP/JSTL, jQuery
Databases	MySQL, PostgreSQL, MongoDB
Tools	Maven, Git/GitHub, Postman, IntelliJ IDEA, Eclipse, VS Code
Core Concepts	OOP, Data Structures & Algorithms, Collections, Multithreading, Concurrency, MVC

EXPERIENCE

Founder's Office Intern · *Foreman Labs (industrial-AI startup)* **Oct 2026 – Present**

- Work with the founders on NOVA, an AI platform that interviews machine operators and uses machine data to deliver AI-guided fixes.
- Build frontend features in React and Next.js; role extends to Python and AI-agent development on the platform.
- Conduct market research and run the company's LinkedIn and X presence for customers and investors.

Java Developer · *The Basics Digital Solutions, Indore* **Apr 2026 – May 2026**

- Developed enterprise modules with Java, Spring MVC, JSP/JSTL, jQuery and MySQL in a large legacy codebase.
- Enhanced the Verified WhatsApp messaging module with template management, media handling and validation workflows.
- Resolved production issues by tracing request flows across JSP, jQuery, JSON and Spring MVC controllers.

Full Stack Development Intern · *QCecuring Technologies, Remote* **Oct 2025 – Nov 2025**

- Built Spring Boot services and Angular modules for an SSL certificate lifecycle management platform.
- Designed an asynchronous report-generation pipeline and REST APIs for SSL reports on expired certificates and keys.

PROJECTS

Staffy — Employee & Task Management Platform · *Spring Boot, Spring Security, JPA, JWT, React* **Jun 2026**

- Built a full-stack employee management system with JWT authentication and role-based access for Admin, Manager and Employee.
- Designed layered REST APIs with Spring Security, Spring Data JPA, DTOs, Bean Validation and global exception handling.
- Implemented task assignment, status tracking, comments, pagination, search and filtering, enforced by role.
- Built analytics dashboards on optimized JPA queries: workload distribution, overdue tasks and status trends.

ATM Simulation System · *Java, JDBC, MySQL* **May 2025**

- Built a layered ATM system with PIN authentication, withdrawals, deposits, transfers and transaction history, with exception handling for reliable transactions.

EDUCATION

B.E., Electronics & Instrumentation Engineering · *Shri G.S. Institute of Technology and Science (SGSITS), Indore* **May 2026**

ACHIEVEMENTS

- **LeetCode:** Solved 120+ data structures and algorithms problems; contest rating 1519.
